freeze your cheese

Frozen cheese can change texture and become crumbly when thawed, but still works well in cooked dishes like sauces, soups and casseroles. Follow these tips and your cheese will keep for months:

- Store your cheese in the unopened original packaging, or in zip-top freezer bags with the air pressed out.
- If you intend to store sliced cheese, separate the slices using parchment paper and store it in a bag or airtight container.
- Cheddar, Gouda, Swiss, Chevre and Brie are all great options for freezing.
- Thaw cheese in the refrigerator or cook it from the frozen state on pizzas, in casseroles, or in a grilled cheese sandwich.
- Use thawed cheese within two to three days of pulling it from the freezer.
- Use frozen cheese within three months.

how to dilute

Face: 2 or 3 drops of soap on wet hands, applied to wet face.

Body: one small squirt of soap on a wet washcloth, applied to a wet body.

All-purpose cleaner: ¼ cup of soap in a quart of water in a spray bottle. Add ¼ tsp. tea tree essential oil if desired.

Dishes (handwashing): Pre-dilute 1 part soap with 10 parts water. Squirt on a scrub brush and scrub dishes.

- Helps ease muscle tension, soreness, stiffness, and cramps after physical activity.
- Supports relaxation
- Hydrates dry skin, soothes inflammation, itching, and reduces flaking

DIY AROMATIC BATH SALT

Salts (magnesium or epsom) do not properly disperse essential oils in the bath alone. Combine the essential oils with a carrier oil and salt, then add to the bath.

HOW TO MAKE: Place 20-30 drops of essential oil in a bowl, add 2 Tablespoons of carrier oil. Add 2 cups of bathing salts. Store in glass jar. Add ½ cup to running bath water.

IMPROVED BRAIN HEALTH

Creatine may support brain health by providing energy to brain cells, reducing mental fatigue and making it easier to focus.

It may reduce the risk of neurodegenerative diseases and or prevent further degeneration.

PHYSICAL HEALTH BENEFITS

Creatine helps produce ATP, the primary energy carrier in cells, which can boost overall energy levels, muscle strength as well as recovery after injury or intense physical exercise.

As we age, creatine can prolong an active lifestyle and prevent muscle + bone density loss.

METABOLIC BENEFITS

Better blood sugar control: Creatine supports sugar transport into muscles, improving blood sugar control and potentially reducing the risk of diabetes.
